## Message from Waste Industries-GFL:

Now more than ever it is critical that your trash is bagged and placed in the toter(s). Do not mix yard waste with trash and try not to overfill the containers. Dispose of medical waste properly. Recyclables should not be bagged and please break down cardboard and place in recycle toter(s). Hazardous materials and electronics cannot be placed in the trucks.

## Tips for Saving Water

Check faucets and pipes for leaks. A leaking toilet results in a tremendous amount of water loss. Every day that a silent leak goes undetected can amount to as much as 300 gallons of water. A small drip from a worn faucet washer can waste 20 gallons of water per day. Larger leaks can waste hundreds of gallons.

One way to cut down on water use is to turn off the shower after soaping up, then turn it back on to rinse. A four-minute shower uses approximately 20 to 40 gallons of water.

Cecilton Town Park is open from dawn to dusk. Although it may be winter, the park can still be a fun place to be. Walk your dog, on a leash, around the park. Children can enjoy climbing on the playground equipment. Get some fresh air and keep fit using the exercise equipment.
